CARDIOVIT MS-2007

Small, handy 12-channel ECG device

The CARDIOVIT MS-2007 is a lightweight, portable and compact ECG analysis system that accompanies you wherever you go. It was designed to be as easy as "connect and click," while ensuring high quality ECG data. This makes the CARDIOVIT MS-2007 ideal for home visits.

Advanced diagnostic tools provide highest quality ECG analysis and the user-friendly operation allows you to concentrate entirely on the diagnosis and treatment.

- 12-channel colour display provides clear results
- 12-channel printout in real time
- Intuitive touchscreen keypad for simple, one-touch operation
- Compact and light: only 1.2 kg
- Rechargeable lithium-polymer battery: up to 3 hours of operation or 100 ECG recordings

SCHILLER AG
pioneering company
since 1974

Patient data

Easy patient data entry via the intuitive touch screen keyboard.

Automatic preview

The digital on-screen preview gives you an overview of the ECG before printout, eliminating the need for several printouts or expensive additional examinations.

Analysis

The SCHILLER interpretation software "C" offers a comprehensive, computer-based analysis to quickly and reliably evaluate adult and children ECGs.

ECG data management system SEMA

By connecting the device to the SCHILLER data management system SEMA, data from the CARDIOVIT MS-2007 can be saved and searched centrally on your PC. The SCHILLER data management system SEMA is a completely scalable program that can be easily upgraded for expanded functionality and more efficient ECG workflows. Entire worklists can also be downloaded from an HL-7 system or PACS (DICOM Modality Worklist). The device can then export the performed recordings in the HL-7, DICOM or PDF format (including waveform data) to your EMR (electronic medical record) or HIS system (hospital information system).
